

EXPERIMENTAL PSYCHOLOGY PRACTICAL

PART I

Attention

1. Span of attention
2. Set in attention
3. Division of attention
4. Distraction of attention
5. Colour blindness test
6. Depth perception

Each student is required to conduct a minimum of 4 experiments from the above experiments and submit record for evaluation at the end of the fourth semester. The list includes experiments that measure attention and perception. Evaluation will be made at the end of fourth semester.
