Water Management Club Report 2020-2021

**Convener : Ms.
Dhanya K**
**Representatives :
Mr. Amalu Joseph**

: Ms. Diya Maria Sebastian

Executive Body (2020-2021)

Ex-officio Members		
01	Dr. Chacko K.V.	Principal, ACT
02	Rev. Fr. Shenish Augustine	Vice Principal, ACT
03	Rev. Fr. Geo Mathew	Coordinator, IQAC
Members		
04	Ms. Dhanya K	Convenor
05	Ms. Sanamma P V	Member Faculty
06	Mr. Deepesh K	Member Faculty
07	Ms. Amalu Joseph (B.Com Finance)	Student Representative
08	Ms. Diya Maria Sebastian (B.Com Finance)	Student Representative

Introduction

Although the earth is rich in water, only one percent is liquid fresh water, the form we require for our highest priority needs. The demands on this liquid fresh water are growing, and many scientists feel that a future shortage of fresh water will be eminent. Water conservation and management emphasizes water quality protection, a growing area of employment and environmental concern. Water conservation and management encompasses the policies, strategies and activities made to manage water as a sustainable resource, to protect the water environment, and to meet current and future human demand. Population, household size, and growth and affluence all affect how much water is used. Factors such as climate change will increase pressures on natural water resources especially in industrial and agriculture.

Objectives

- To promote culture of conservation of water by minimizing the use of water
- To educate students to create awareness among water conservation
- To protect natural water bodies and their aquatic environment
- To motivate students about the importance of saving water
- To promote conditions for environmentally sustainable, economically efficient and equitably allocated use of water resources

Outcomes

The members would:

- Be motivated to adopt practices that conserve water
- Participate and take up purposeful activities for water conservation
- To realize the importance of water Conservation

2020-2021(Reporting Year)

Under the leadership of the Water Management Club, three activities have been conducted this year. Although this Academic Year started with high hopes, at the beginning of the Academic Year, we were not able to implement all the extensive activities. However all the work has been done in a small way. This Year the Club has been able to raise awareness among the students despite the adverse conditions.

Action Plan (2020-2021)

Month	Date/Time	Programme	Remarks
July	13/07/20	Poster Making Competition	Online Talent Hunt
July	12/07/20	Rain Water Harvesting	
August	14/08/20	Seminar on Water Conservation	
October	28/10/20	Save Water Save Earth Rally	
November	13/11/20	Painting exhibition	
November	30/11/20	Survey on Water Conservation	
December	16/12/20	Seminar	Waste Water Recycling

Water Management Club Report 2020-2021

Programme List

Sl.No	Name of Programme	Date Conducted
1	Poster making competition	14-08-2020
2	Power point presentation about water conservation among students	24-08-2020
3	World Water Day Celebration-Puzha Nadatham	22-03-2021

1. Poster making competition (14-08-2020)

We conducted a poster making competition on 14-08-2020, theme was conserve water conserve nature, it was only for alphonians and 8 students were participated. Winners are Chandana.M.K from Third Semester B.Sc Psychology (First Prize) Anagha Raj, from Fifth Semester BA English (Second Prize) and Meenu Lakshmi, Third Semester B.Sc Psychology (Third Prize).

1) Attendance Sheet

Sl.No	Name of Student	Class
1	Alan Sam Mathew	B Com CA Fifth Semester
2	Grace Maria George	B A English
3	Anagha Raj	B A English Fifth Semester
4	Meenu Lakshmi KK	B.Sc Psychology Third Semester
5	Shalet Zechariya	BBA Fifth Semester
6	Chandana M K	B.Sc Psychology Third Semester
7	Abhijith Shaji	B Com CA Third Semester
8	Delbin	B Com CA Third Semester

3) Brochure

The brochure is for a poster-making competition organized by the Water Management Club at Alphonsa College. The top section features the college's logo and name, along with its affiliation to the University of Calicut. The central theme is water conservation, illustrated by a large blue water drop and a globe with a leaking faucet. The competition title is prominently displayed in red, and the prizes are listed in a blue circle. The bottom section provides the deadline and contact information.

General Assessment and Suggestions

A number of events were planned for this year under the leadership of Water Management Club. This year we have only been able to get Covid 19 to do very little work in this context. Our Club has conducted three activities this year while conducting an analysis is general. Two of them have been conducted online and one offline. Poster Making Competition and Power point presentation was conducted online.(Puzhanadatham) The river cleaning program on the occasion of World Water Day was very much interested and it had a huge impact on the students. All the activities of Water Management Club in this year have been done very well. All the activities carried out this year have received excellent support from the students, teachers and the management side. On behalf of the students to improve the functioning of the club in the years to come, better participation needs to be ensured. In order to improve the activities of the club next year, a variety of activities will have to be done.

Conclusion

“Clean water is inestimably precious to waste!” said by Mohith Agadi is a very true statement. For anything and everything to survive, the water is a must. Water is very essential for all life forms to survive and grow. For any personal, commercial, industrial, or any other use the water is required.

Without this perishable and precious resource, life on earth cannot be imagined. It is crucial to conserve water and also to preach people on the ideas and tactics related to saving water. It is impossible to measure the value of water. So, it is our moral responsibility to avoid abuse of water and focus on adopting methods to save water

Water is the most essential, perishable, and precious resource on earth. Unwanted and unnecessary use of water can lead to famine, droughts, and various other problems. Without water, no one can survive and no sector of the society can perform their functions well. Freshwater supply is limited and the need to save it is very important. Saving water is not the duty of any single individual but of the whole nation. To conclude, we would like to request you all to take a vow to save water and have a beautiful life for us and our coming generation.

Thanks
